Transport projects in St Albans, Edgeware and Mairehau

What	Potholing to locate services
Where	Westminster Street / Cranford Street intersection
When	From Monday 2 March 2020 for approximately two weeks
Contact	Fulton Hogan on 0800 7623 34 (0800 ROAD FH) (Mon - Fri, 8am - 5pm) or email cant.info@fultonhogan.com . After business hours, please feel free to call us if the matter is urgent. Please advise us if you have specific property and access requirements e.g. vehicle deliveries, medical visits, planned work.

What are we doing?

From Monday 2 March for approximately two weeks, 9am - 2.30pm weekdays, we will be potholing to locate services at Westminster Street / Cranford Street intersection.

Traffic impacts

During this time, there will be no left and right turns from Cranford Street onto Westminster Street. When one direction of traffic on Cranford Street is affected, the opposite direction will remain unaffected. i.e. northbound traffic on Cranford Street will have turning restrictions at times; southbound traffic will have turning restrictions at times.

Pedestrian access will be maintained around this intersection, however one of the four crossings at this intersection may be closed at times and pedestrians will be detoured around this. Pedestrians will also be shifted closer to the shop frontages. Our friendly staff will help people get around our site.

We will need to restrict some on-street parking, so will place no parking cones out before we start work. We will aim to minimise this as much as possible.

Please be on the lookout for changes in traffic management and follow the signs.

Key

-  Road closures on Malvern St and Dee St at Cranford St intersection.
-  No right turn from Cranford St onto Westminster St at times between 9am to 2.30pm.
-  No left turn from Cranford St onto Westminster St at times between 9am to 2.30pm.

Thanks for your patience as we work in your area

Noise

There may be increased noise, dust and vibrations during work but it shouldn't impact on your power, water, gas or phone services.

Safety

Safety is our biggest priority so please keep children and pets away from worksites.

Bins

Please put your bins out as usual, before 6am on your collection day. Our crew will move and return them if needed.

Other projects

How do we carry out potholing?

During potholing, a hydrovac will be on site. This machine uses high-pressure water and a powerful vacuum to remove soil, which is noisy work.

The soil is then transferred to a debris tank to keep mess to a minimum. This is a safe, non-destructive and accurate way to remove soil or locate underground utilities, such as pipes, electrical cables and phone lines.

We know this work is disruptive so we aim to complete this work as quickly as possible.
