

START WORK NOTICE Redwood Park

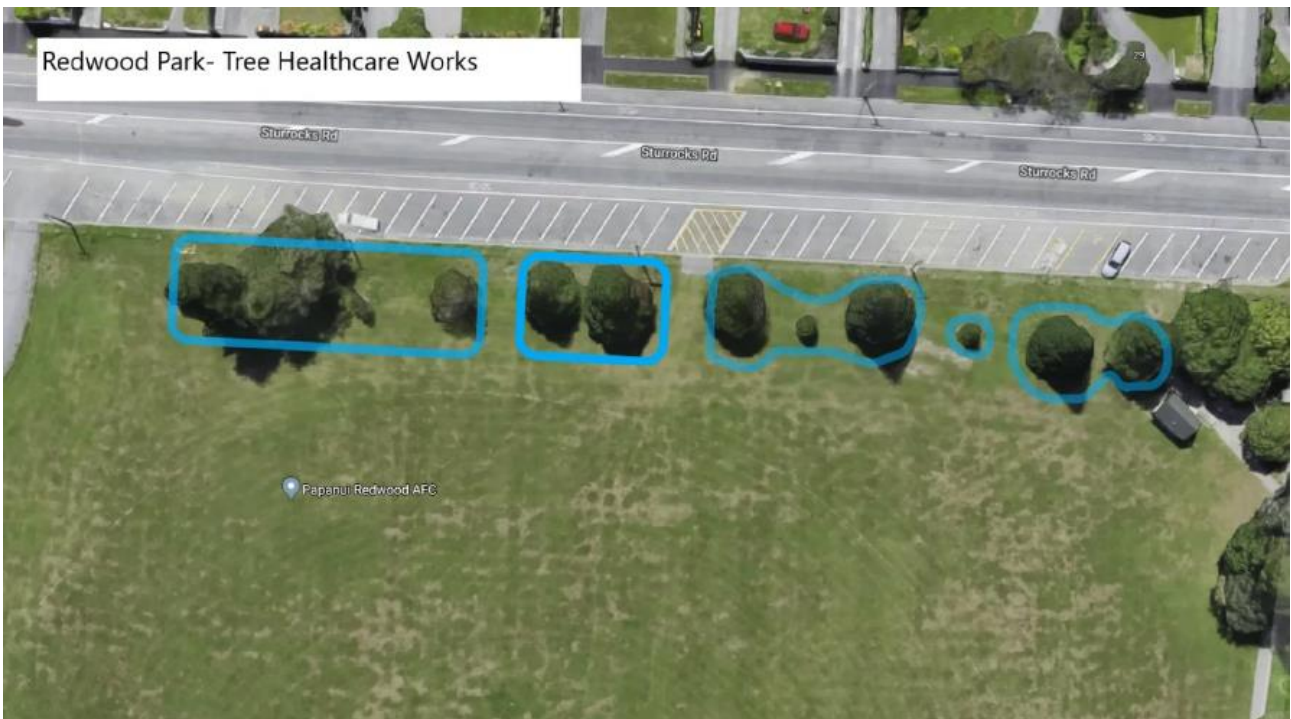

23 March 2020

This notice is to advise of the upcoming tree healthcare project to revive a number of declining Redwood trees on the northern boundary of the park.

The healthcare programme is a multi-phase project covering a period of 36 months with the goal of improving soil conditions for the benefit of the affected trees. The first phase of this project was undertaken on Wednesday 18 March whereby an organic solution was applied to the competing grass around the trees. **This area will then be mulched and some lime added.**

We are commencing the second phase of the project on the Monday 30 March through to Friday 3 April. During this time we will be airspading around the trees, applying a microbial agent along with a top dressing of mulch.

For enquiries relating to the Contractor's operations, please contact the Treotech representative: **Mark Fagg** on **03 383 9370** or email **mark@treotech.co.nz**. For any other enquiries, please contact the Council representative overseeing this project: **Dieter Steinegg** on **03 941 8683** or email **dieter.steinegg@ccc.govt.nz**.
